

Bag filling machine VL-A

Bag filling machine VL-A

Open Mouth Bags

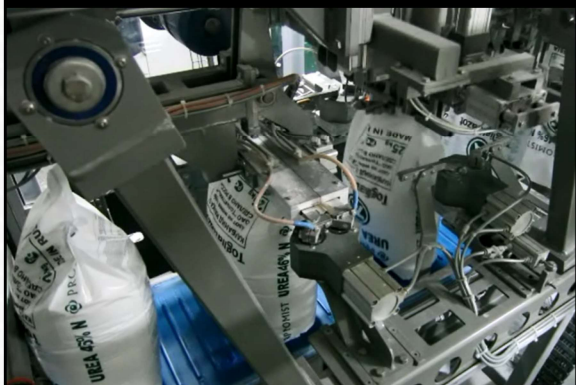

Bags and packaging are continuously being updated and developed to get noticed by the consumer. Standing bags, re-sealable bags, bags with a gusset, bags with a pinch-top or zip closure etc. are all being designed to make the consumer's life easier. Votech has responded to this demand by further developing its bag filling machine for open mouth bags.

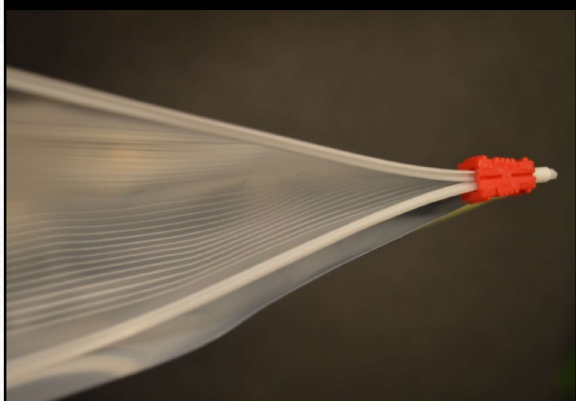

Features

Net dosage

Axial mechanism

Zip closure

- * Bag is held continuously during transport. This results in a perfectly straight seal
- * Easy adjustable for different bag sizes
- * Suitable for free-flowing and poorly-flowing products
- * Suitable for dosing based on weight or volume
- * Robustly build
- * 500 free programmable menu's
- * Low maintenance
- * Equipped with Ethernet connection and WIFI

Variety of closing methods

- Pinch-Top-sealing
- Zip closure
- Sealing
- Sewing (With or without crêpe tape and single folding)
- Combination Pinch-Top, sealing and sewing inside one machine is also possible
