

PORTABLE SEWING HEAD

What is a portable sewing head ?

The Fischbein portable is ideal for sewing every type of open mouth bag including paper, woven polypropylene, PE, PP, jute, and more. The closure can be done by plain sewing, sewing a folded bag top or sewing with crepe paper.

Which product ?

Pet food, animal feed, seeds, sugar, flour, cereals, seeds, milk powder, onions, carrots, coffee, wheat, noodles, rice, condiment, salt, spices, coal, sand, gravel, wood, grains, ...

Why this equipment ?

Quality, profitability and performance

The Fischbein F-Series portable industrial sewing machine delivers the quality, durability, and productivity you expect from Fischbein. It incorporates the qualities of previous models (D, EE, ECR, ...), which have been used and recognized worldwide for many years.

The Fischbein portable delivers reliability, low noise, easy to use and easy to maintain; making it the benchmark in the market.

Key figures

Up to 250 bags/h

Bag thickness, up to 7 mm

Bag weight, between 0,5 kg and 100 kg

YOUR NEED

OUR SOLUTION

PRODUCT	TYPE OF SEWING	MODEL	DESCRIPTION
Pet food, animal feed, seeds, sugar, flour, cereals, seeds, milk powder, onions, carrots, coffee, wheat, noodles, rice, condiment, salt, spices, coal, sand, gravel, wood, grains, ... 	Plain sewing or sewing a folded bag top 	F TYPE 50224F	Before sewing, the operator can fold the bag. In standard, the portable is equipped with an electrical motor. Our range also proposes a model with a pneumatic motor, the type 50003F. The model FB, without motor and without handle, type 50004F, is designed to fit in our mini sewing systems.
			F-H TYPE 50226F This model sews all kinds of materials but in a horizontal position.
	Tape sewing 	F-TA TYPE 50225F	This portable closes the bag with a tape of 50 mm and it is equipped with a mechanical chain-tape scissors knife. We have a model for a tape of 70 mm (type 50225F-A).

Some options

Suspension unit

The suspension unit is equipped with a tension spring which makes the portable immediately available for effortless bag sewing. This eliminates the risk of the sewing machine falling.

A reinforced version of the suspension unit is available for the F-Tape version.

Suited for all regions in the world

Our portable sewing machines are available with different plugs (Switzerland, UK, ...) and in different voltages.

Fischbein consumables

Fischbein consumables are precisely manufactured and tested to maximize the performance of your bag sewing equipment. Our consumables guarantee you reliability and quality of your bag closures. By choosing our consumables, you choose the best quality !

Premium sewing thread

Fischbein sewing thread features an enhanced textile strength and a linear quality which guarantees a smooth sewing process even at high speeds and contributes to strong bag closures. It is available in a variety of colors and materials. (pes, viscose, low-temperature soluble, etc.).

Crepe paper

Fischbein crepe paper improves the closure tightness, and it can make the bag easier to open. The high-quality paper provides very good stretch and tensile properties to give high efficiency to any machine. It is available in a variety of colors and sizes.

Needles

The high mechanical stresses to which needles are exposed demand the highest levels of quality control. Fischbein supplies quality needles that ensure a long service life. They are available in round or square tips which is usually determined by the bag material (paper, jute, PE, woven PP, etc.).

Genuine spare parts

Genuine spare parts stamped with the Fischbein logo guarantee you get the highest quality and increased reliability. They are manufactured under strict guidelines and dedicated quality control. All parts undergo specific surface treatments to ensure the best performance.

Need a full automatic line ?

Our range from the Votech brand proposes you a variety of bag filling machines, palletisers and stretch-hooders.
